

I would like to express my desire to be able to pick my own isp. I do not want to be forced into taking an isp not of my choice. Freedom of choice especially in isp's would help people by forcing the isp's to be competitive. This is a major mistake taking away our right to choose. The individuals responsible for this type of legislation should be terminated from their current jobs if they are employed with the government and not be allowed to hold a position in state or federal areas. thank you
